CONTENTS

Volume 2, Issue Nos. 1–4
International Journal for
NUMERICAL METHODS IN ENGINEERING

Issue No. 1, JANUARY–MARCH

Announcement 2

Editorial 3

B. M. Irons: A Frontal Solution Program for Finite Element Analysis 5

R. K. Livesley: Automatic Design of Guyed Masts subject to Deflection Constraints . . 33

R. L. Taylor, K. S. Pister and G. L. Goodreau: Thermomechanical Analysis of Viscoelastic Solids 45

O. C. Zienkiewicz and C. J. Parekh: Transient Field Problems: Two-Dimensional and Three-Dimensional Analysis by Isoparametric Finite Elements 61

P. Tong: New Displacement Hybrid Finite Element Models for Solid Continua . . . 73

L. S. D. Morley: A Finite Element Application of the Modified Rayleigh–Ritz Method 85

G. M. Lindberg and M. D. Olson: Convergence Studies of Eigenvalue Solutions using Two Finite Plate Bending Elements 99

H. Tottenham: A Direct Numerical Method for the Solution of Field Problems . . . 117

C. O. Frederick, Y. C. Wong and F. W. Edge: Two-Dimensional Automatic Mesh Generation for Structural Analysis 133

Letters to the Editor 145

Issue No. 2, APRIL–JUNE

H. Allik and T. J. R. Hughes: Finite Element Method for Piezoelectric Vibration . . 151

J. T. Oden, D. M. Rigsby and D. Cornett: On the Numerical Solution of a Class of Problems in a Linear First Strain-Gradient Theory of Elasticity 159

P. B. Grimado and B. A. Boley: A Numerical Solution for the Symmetric Melting of Spheres 175

H. Armen, Jr., G. Isakson and A. Pifko: Discrete Element Methods for the Plastic Analysis of Structures subjected to Cyclic Loading 189

T. L. Cost and E. B. Becker: A Multidata Method of Approximate Laplace Transform Inversion 207

K. K. Gupta: Vibration of Frames and other Structures with Banded Stiffness Matrix . 221

Y. Tada and G. C. Lee: Finite Element Solution to an Elastica Problem of Beams . . 229

L. J. Doctors: An Application of the Finite Element Technique to Boundary Value Problems of Potential Flow 243

I. M. Smith and W. Duncan: The Effectiveness of Excessive Nodal Continuities in the Finite Element Analysis of Thin Rectangular and Skew Plates in Bending 253

E. Anderheggen: A Conforming Triangular Finite Element Plate Bending Solution . . 259

R. H. Gallagher and C-H. Lee: Matrix Dynamic and Instability Analysis with Non-Uniform Elements 265

V. V. Shanbhag and R. Narasimha: Numerical Evaluation of the Transonic Wave Drag Integral 277

R. L. Sakaguchi and B. Tabarrok: Calculations of Plate Frequencies from Complementary Energy Formulation 283

Comment 295

Book Review. 299

Report 301

Issue No. 3, JULY–SEPTEMBER

A. Ženíšek and M. Zlámal: Convergence of a Finite Element Procedure for Solving Boundary Value Problems of the Fourth Order 307

R. Edwards and A. Bradley: Design of Digital Filters by Computer 311

R. S. Barsoum and R. H. Gallagher: Finite Element Analysis of Torsional and Torsional-Flexural Stability Problems 335

K. M. Gisvold and J. Moe: Buckling Analysis by Means of Non-linear Programming . 353

C. C. Fu and B. Paul: Energy Transfer Through Chains of Impacting Rods 363

E. A. Wilson and B. Parsons: Finite Element Analysis of Elastic Contact Problems Using Differential Displacements 387

J. Sucec: Numerical Prediction of the Temperature Distribution in the Initial Region of a Two-Dimensional Turbulent Film Cooling Configuration 397

T. K. Hellen and H. A. Money: The Application of Three-Dimensional Finite Elements to a Cylinder–Cylinder Intersection 415

S. Ahmad, B. M. Irons and O. C. Zienkiewicz: Analysis of Thick and Thin Shell Structure by Curved Finite Elements 419

Comment 453

Letters to the Editor 455

Issue No. 4, OCTOBER–DECEMBER

M. Giannini and G. A. Miles: A Curved Element Approximation in the Analysis of Axi-Symmetric Thin Shells 459

Isaac Fried: A Gradient Computational Procedure for the Solution of Large Problems arising from the Finite Element Discretization Method 477

Kari Appa: Kinematically Consistent Unsteady Aerodynamic Coefficients in Supersonic Flow 495

Sohrabuddin Ahmad, Bruce M. Irons and O. C. Zienkiewicz: A Simple Matrix-Vector handling Scheme for Three-Dimensional and Shell Analysis 509

Ian P. King: An Automatic Reordering Scheme for Simultaneous Equations derived from Network Systems 523

A. Brameller and K. L. Lo: The Application of Diakoptics and the Escalator Method to the Solution of Very Large Eigenvalue Problems 535

Dusan Krajcinovic and George Herrmann: Numerical Solution of the Dynamic Stability Problems 551

G. Dupuis and J.-J. Goël: Finite Element with High Degree of Regularity 563

Suryanarayan Patnaik and Pasala Dayaratnam: Behaviour and Design of Pin Connected Structures 577

D. J. F. Ewing, A. J. Fawkes and J. R. Griffiths: Rules Governing the Numbers of Nodes and Elements in a Finite Element Mesh 595

Table of Contents, Volume 2 603

Author Index 607

AUTHOR INDEX, VOLUME 2

Ahmad, S., Irons, B. M., and Zienkiewicz, O. C.: Analysis of thick and thin shell structure by curved finite elements, 419

——: A simple matrix–vector handling scheme for three-dimensional and shell analysis, 509

Allik, H., and Hughes, T. J. R.: Finite element method for piezoelectric vibration, 151

Anderheggen, E.: A conforming triangular finite element plate bending solution, 259

Appa, K.: Kinematically consistent unsteady aerodynamic coefficients in supersonic flow, 495

Armen, H., Jr., Isakson, G., and Pifko, A.: Discrete element methods for the plastic analysis of structures subjected to cyclic loading, 189

Barsoum, R. S., and Gallagher, R. H.: Finite element analysis of torsional and torsional-flexural stability problems, 335

Becker, E. B.: see Cost, T. L., 207

Boley, B. A.: see Grimado, P. B., 175

Bradley, A.: see Edwards, R., 311

Brameller, A., and Lo, K. L.: The application of diakoptics and the escalator method to the solution of very large eigenvalue problems, 535

Cornett, D.: see Oden, J. T.: 159

Cost, T. L., and Becker, E. B.: A multidata method of approximate Laplace transform inversion, 207

Dayaratnam, P.: see Patnaik, S., 577

Doctors, L. J.: An application of the finite element technique to boundary value problems of potential flow, 243

Duncan, W.: see Smith, I. M., 253

Dupuis, G., and Goël, J.-J.: Finite element with high degree of regularity, 563

Edge, F. W.: see Frederick, C. O., 133

Edwards, R., and Bradley, A.: Design of digital filters by computer, 311

Ewing, D. J. F., Fawkes, A. J., and Griffiths, J. R.: Rules governing the number of nodes and elements in a finite element mesh, 595

Fawkes, A. J.: see Ewing, D. J. F., 595

Frederick, C. O., Wong, Y. C., and Edge, F. W.: Two-dimensional automatic mesh generation for structural analysis, 133

Fried, I.: A gradient computational procedure for the solution of large problems arising from the finite element discretization method, 477

Fu, C. C., and Paul, B.: Energy transfer through chains of impacting rods, 363

Gallagher, R. H., and Lee, C.-H.: Matrix dynamic and instability analysis with non-uniform elements, 265

——: see Barsoum, R. S., 335

Giannini, M., and Miles, G. A.: A curved element approximation in the analysis of axi-symmetric thin shells, 459

Gisvold, K. M., and Moe, J.: Buckling analysis by means of non-linear programming, 353

Goël, J.-J.: see Dupuis, G., 563

Goodreau, G. L.: see Taylor, R. L., 45

Griffiths, J. R.: see Ewing, D. J. F., 595

Grimado, P. B., and Boley, B. A.: A numerical solution for the symmetric melting of spheres, 175

Gupta, K. K.: Vibration of frames and other structures with banded stiffness matrix, 221

Hellen, T. K., and Money, H. A.: The application of three-dimensional finite elements to a cylinder–cylinder intersection, 415

Herrmann, G.: see Krajcinovic, D., 551

Irons, B. M.: A frontal solution program for finite element analysis, 5

——: see Ahmad, S., 419

——, 509

Isakson, G.: see Armen, H., Jr., 189

King, I. P.: An automatic reordering scheme for simultaneous equations derived from network systems, 523

Krajcinovic, D., and Herrmann, G.: Numerical solution of the dynamic stability problems, 551

Lee, C.-H.: see Gallagher, R. H., 265

Lee, G. C.: see Tada, Y., 229

Lindberg, G. M., and Olson, M. D.: Convergence studies of eigenvalue solutions using two finite plate bending elements, 99

Livesley, R. K.: Automatic design of guyed masts subject to deflection constraints, 33

Lo, K. L.: see Brameller, A., 535

Miles, G. A.: see Giannini, M., 459
Moe, J.: see Gisvold, K. M., 353
Money, H. A.: see Hellen, T. K., 415
Morley, L. S. D.: A finite element application of the modified Raleigh–Ritz method, 85

Narasimha, R.: see Shanbhag, V. V., 277

Oden, J. T., Rigsby, D. M., and Cornett, D.: On the numerical solution of a class of problems in a linear first strain-gradient theory of elasticity, 159
Olson, M. D.: see Lindberg, G. M., 99

Parekh, C. J.: see Zienkiewicz, O. C., 61
Parsons, B.: see Wilson, E. A., 387
